

Winsor Homes

429 Daniel Webster Hwy, Meredith, NH 03253

(603) 279-6548 or (800) 228-5013 FAX (603) 279-5910 winsorhomes@metrocast.net

Winsor Homes is a family business with over 40 years (since 1973) building and modular home construction experience. With our expertise we can help walk you through the entire building process. We have no “sales people” working on commission, and thus no high-pressure sales. The owners are your salespeople, which results in conscientious service and attention to detail. We are a small office, committed to guiding our homeowners through the complex process of building their dream home. At Winsor Homes, you will not become a volume number. A new home is a major investment and personal service is required. For almost 90% of our projects, Winsor Homes acts as the general contractor and handles the coordination of site excavation, foundation and well drilling, making your new home purchase worry free. Dave Winsor, owner of Winsor Homes, runs all of his own crane sets. All homes by Winsor Homes are crane set and completed by our own crews and not inexperienced set crews with no vested interest in your project. All of our homes meet or exceed local building codes and many of our homes are designed with Energy Star certification in mind. Modular construction offers thousands of design options for single family residences, vacation homes, cabins and multifamily homes. Customized designs to suit each homebuyer’s needs are available and plan customization does not cost extra. Modular construction does not penalize the homebuilder for modifications or changes to best suit their needs.

Winsor Homes also has custom carpentry crews that can site build virtually any desired option if not available from the manufacturer.

Modular construction has many advantages to consider. Modular construction is consistently less expensive than traditional stick built projects due to factory construction which prevents weather delays. Factory construction also has better utilization of materials and thus less waste is generated, resulting in consumer savings. In addition, modular construction takes significantly less time from project start to finish. With a factory built home, cost overruns are eliminated, and once a contract is in place, pricing does not change due to volume purchasing of materials. Winsor Homes is happy to assist you in obtaining financing with local banks, mortgage companies, FHA or VA packages. We can help you find the best financing to suit your needs and assist you with bank paperwork. With our experience and expertise we consider ourselves the best choice for a modular project. We have hundreds of homes throughout New Hampshire and have extensive knowledge of modular design, set up, and on site finish. We feel that based on the above information, the quality of our homes and our impeccable service, a “Winsor Home” is the only home to build. That’s why we are the “Leader in Modular Homes”.
